A secure storage center, built to a defense standard.

A secure storage complex consisting of **seven independent vault warehouses** located in the northwest region of the Czech Republic — designed for firearms, ammunition, defense products, dual-use goods, sensitive equipment and other high-value assets requiring the highest level of physical protection.

The facility operates as a secure vault storage center with 24/7 monitoring, advanced security systems and full compliance with fire-safety regulations.

07 Independent vault warehouses	180 m² Protected space per unit	4,000 m² Fenced & monitored premises	24/7 Monitoring & incident response
---	--	---	---

FIG. 01 — WALLED COMPOUND & SECURED YARD · AERIAL SURVEY

Physical protection, by construction.

Each unit is a discrete, fire-compartmented vault — reinforced masonry, certified access points and a hardened perimeter.

01 Reinforced brick walls Exceeding 300 mm thickness	02 Fire resistance to REI 180 Compartment rating per unit
03 RC5 certified security doors Vault-grade access points	04 Certified steel gates Fire-resistant, rated
05 Separate fire compartment Isolated per warehouse unit	06 Concrete perimeter fencing Heavy-duty, walled site
07 Dedicated loading areas Separated load / unload zones	08 Heavy-truck access Built for logistics operations

FIG. 02 — RATED STEEL GATE

FIG. 03 — VAULT ACCESS CORRIDOR

Engineered fire-safety, defense-grade.

A comprehensive fire-protection system designed to meet stringent industrial and defense-sector requirements — detection, suppression and barriers, per compartment.

FIRE DETECTION

Schrack Seconet fire alarm system

Localized fire detection

Emergency lighting & evacuation guidance

SUPPRESSION

Semi-stationary suppression network

7 independent extinguishing circuits — one per warehouse

Internal fire-water distribution

Automatic electrical-cabinet suppression

On-site fire-water reservoir & hydrants

ADDITIONAL

30 portable fire extinguishers

Photoluminescent emergency navigation

Certified fire doors & barriers

Water-curtain protection systems

7

Independent extinguishing circuits

REI 180

Maximum compartment fire rating

30

Portable extinguishers on site

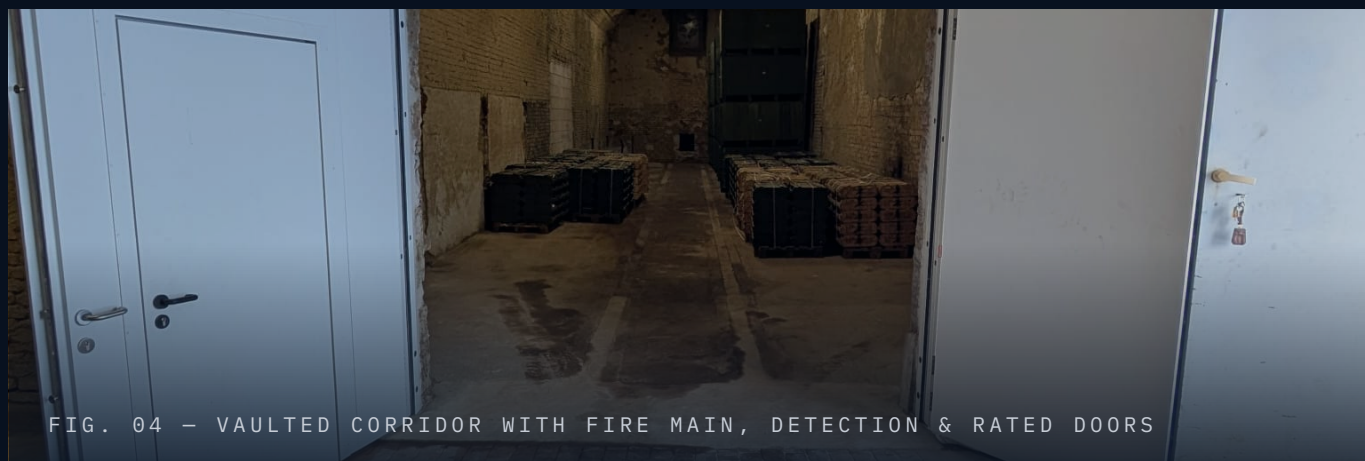

FIG. 04 — VAULTED CORRIDOR WITH FIRE MAIN, DETECTION & RATED DOORS

Multi-layer monitoring, around the clock.

A next-generation intelligent security ecosystem providing continuous monitoring and rapid incident response across all units.

AI-POWERED SECURITY

- ▶ AI-based perimeter monitoring
- ▶ Automated intrusion detection
- ▶ Biometric access control
- ▶ Unauthorized-access prevention
- ▶ Instant alerts & incident notifications
- ▶ Secure video archiving & forensic analysis
- ▶ Real-time video analytics
- ▶ Facial recognition for authorized personnel
- ▶ Critical-zone monitoring
- ▶ Suspicious-activity detection
- ▶ Centralized monitoring across all units

ACCESS CONTROL

- ▶ Controlled entry & exit points
- ▶ Master key management system
- ▶ Role-based access permissions
- ▶ Visitor identification & authorization

FIG. 05 — CONTROLLED VEHICLE GATE & SECURED PERIMETER

Flexible terms for demanding clients.

CUSTOMS OPTION

Temporary Customs Warehouse

The facility can be adapted to operate as a Temporary Customs Warehouse, enabling secure storage of imported and exported goods pending customs procedures.

LEASING MODELS

Long-term warehouse leasing

Short-term storage solutions

Dedicated warehouse zones

Customized security configurations

Tailored logistics support for corporate clients

IDEAL FOR

Defense & Security Industry

Defense manufacturers

Ammunition suppliers

Firearms distributors

Military technology companies

Government contractors

Defense logistics providers

High-Security Commercial Storage

Dual-use product manufacturers

High-value equipment storage

Sensitive technology providers

Industrial asset protection

Secure archival storage

FIG. 06 – PALLETIZED STOCK INSIDE A FIRE-COMPARTMENTED VAULT UNIT

Central Europe, securely connected.

Located in the northwest region of the Czech Republic, the facility provides efficient access to major European transportation corridors and logistics networks.

- ▶ Central European location
- ▶ Secure transportation routes
- ▶ Modern infrastructure & logistics connectivity
- ▶ Fast access to Western & Central European markets
- ▶ Stable legal & business environment

WHY CHOOSE OUR VAULT WAREHOUSES

- ✓ Military-grade physical protection
- ✓ Independent fire-protected units
- ✓ Flexible leasing options
- ✓ Strategic European location
- ✓ Advanced AI security systems
- ✓ 24/7 monitoring & incident response
- ✓ Customs warehouse capability
- ✓ Ideal for defense, dual-use & high-value assets

Secure storage. Maximum protection. Strategic access.

Protected warehouse infrastructure designed for organizations that cannot compromise on security.
